- **Get instant updates.**
- **Find and meet your friends with the optional SocialLights button.**
- **Members can post info updates instantly.**
- **Reach patrons on a regular basis.**
- **Find the good times easily.**

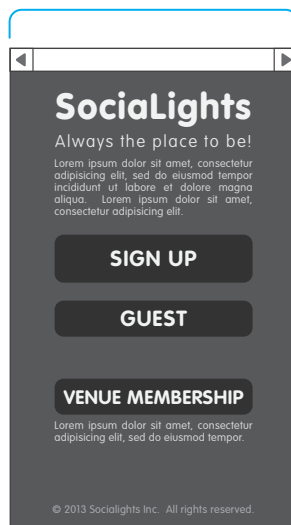

Overview:

SocialLights is an iOS and Android app that allows users access to all participating entertainment venues or activities around them locally or globally. The app will display venue info including food and drink specials, events and more. Users can also connect with their friends via the optional SocialLights button within the app.

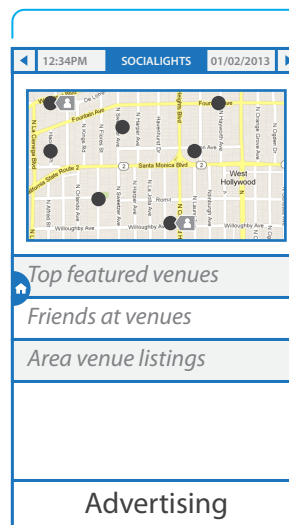

Venues and Event Promoters can participate via memberships. There are four types of monthly memberships; Free, Basic, Standard and Elite. Each with different services and features. Depending on the type of membership, members will be able to post info instantly to the app.

You can think of this app as a modern day social calendar of events bringing people and venues together for a good time.
